SUMMARY

Highly motivated and detail-oriented Web Developer with hands-on experience in building interactive and responsive web applications using HTML, CSS, JavaScript, PHP, and JSON. Skilled in designing user-friendly interfaces, integrating backend functionality with MySQL, and creating dynamic, data-driven web solutions. Adept at problem-solving and delivering efficient, scalable projects. Seeking to contribute technical expertise and creativity to a forward-thinking web development team.

PROJECTS

Student Result Administration System

Self project September 2025 • [Project-Link](#)

- Allows administrators to add, update, and calculate student marks, automatically determining pass/fail status and generating subject-wise or overall reports.
- Provides a secure, organized, and interactive web platform for managing student academic records, reducing manual errors and saving time.

Recipe-website

Self project August 2025 • [Project-Link](#)

- Allows users to explore, search, and view a variety of recipes with ingredients and step-by-step cooking instructions.
- Provides a responsive and easy-to-navigate interface built with HTML, CSS, and JavaScript for an engaging user experience.

An Web-Based Chess-Game

Internship project May 2025 • [Project-Link](#)

- Allows two players to play chess online with valid move rules, turn-based logic, and piece capturing functionality.
- Built with HTML, CSS, JavaScript, and JSON, providing a clean, interactive, and engaging chessboard interface.
